Frontend

Illustration 1: Repertoire list view

Live example: http://www.bat-berlin.de/repertoire/

1. Search form

2. Select box for categories. You can extend the categories i.e. with producers or types among others.

3. A-Z-Browser

Some properties are configurable in the backend user interface with a mouse click.

Illustration 2: Repertoire single view

Live example: http://www.bat-berlin.de/repertoire/stueck/leonce-und-lena/

1. Calendar items
   Expired dates get another CSS class

You can design each record – each repertoire item – individually.

Illustration 3: Calendar with repertoire items (list view)

Live example: http://www.bat-berlin.de/

1. Search form

2. Category menu. You can extend the categorie menu i.e. with producers or types among others.

3. Select boxes with categories. You can extend it with more select boxes.

Illustration 4: Calendar with repertoire item (single view)

Live example: http://www.bat-berlin.de/termin/leonce-und-lena-2/

1. Form for ordering a reservation (online ticket).

2. Link to the shopping cart.

Backend

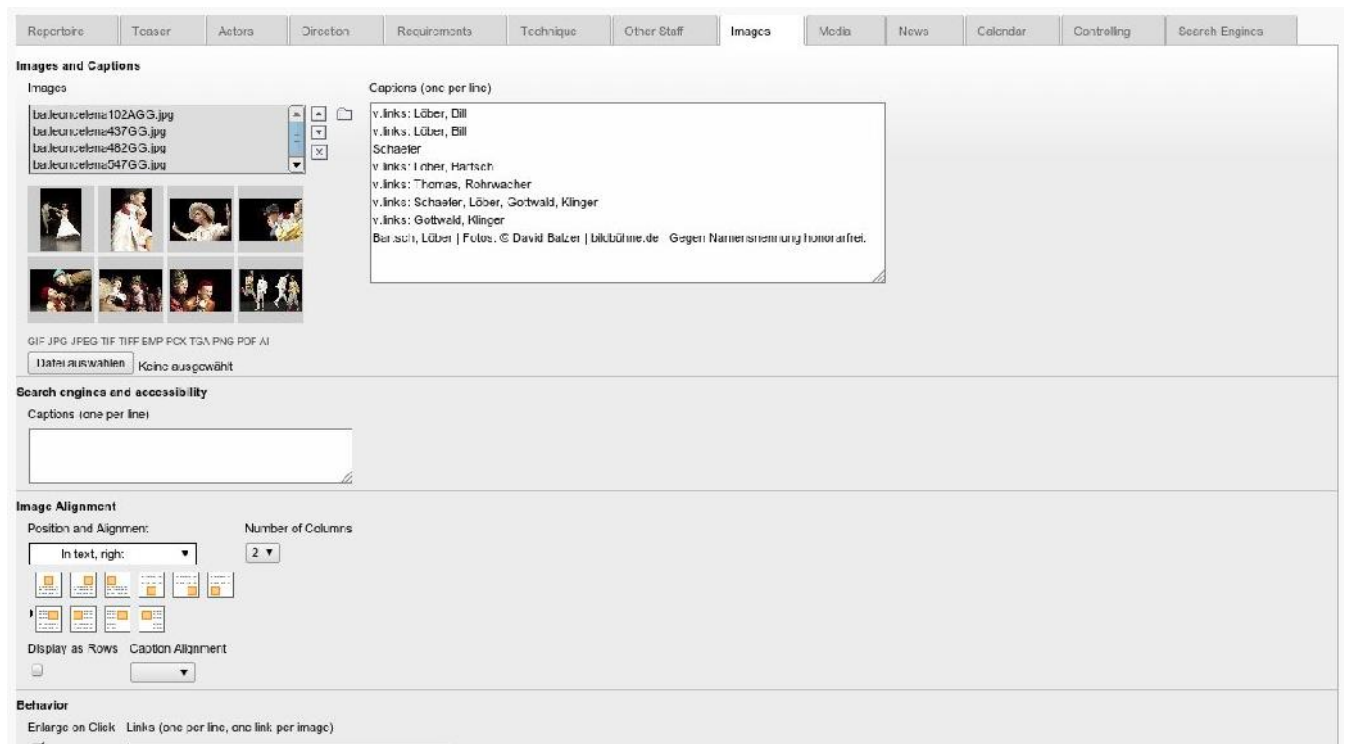

Illustration 5: Repertoire list view

Illustration 6: Repertoire single view

- Repertoire is based on a very complex database. You can take in a lot of data (see the amount of tabs!)
- The current tab (Images) demonstrates the design possibilities: there are 10 layouts.
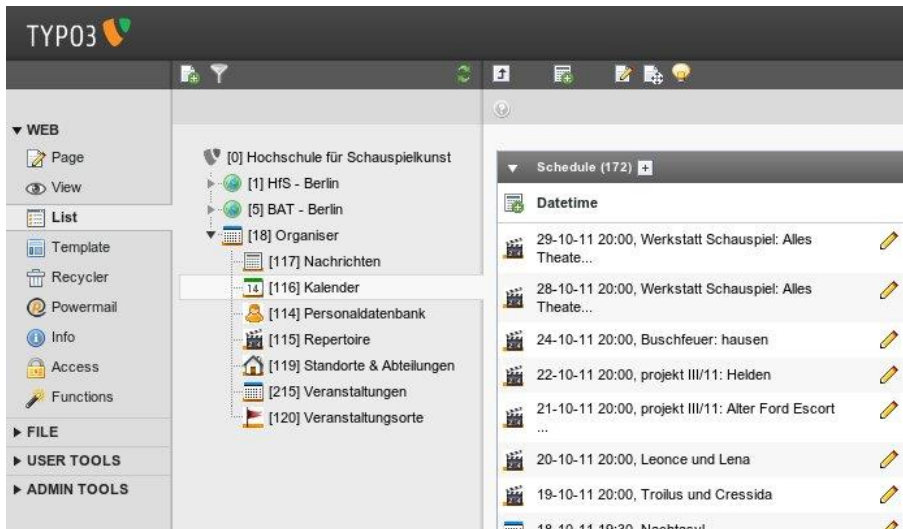

Illustration 7: Calendar list view with repertoire items among others.

- Org +Repertoire extends the Organiser (org) with a database and a lot of properties for repertoire.

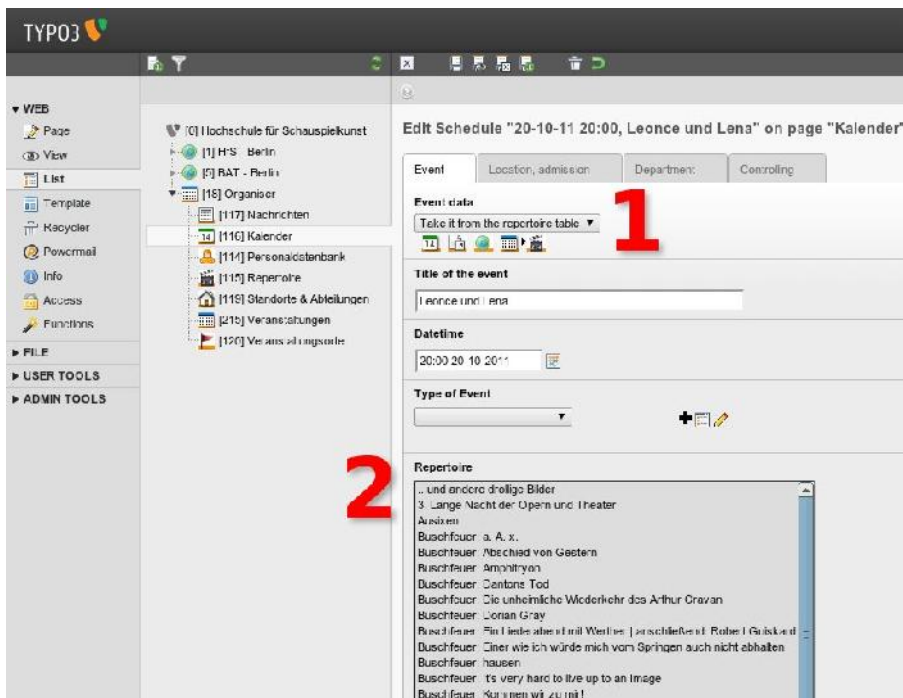

Illustration 8: Calendar single view. You can link to a repertoire item directly

1. Org +Repertoire extends the Organiser (org). After installation there is the new event data type "Take it from repertoire"

2. If you have selected the event data type "Take it from repertoire", the select box with the repertoire items will appear.

Introduction

What does it do?

Org +Repertoire extends Organiser (org) with a database and properties for managing a repertoire.

A repertoire item is a special type of a calendar item like an event.

But it has additional appropriate fields like subject, requirements and actors.

It is connected with the fe_user table.

Workshops blends in the calender items both in the back-end and in the front-end. For that Org +Repertoire is distributed with default templates for HTML and TypoScript.

Org +Repertoire isn't localised.

Org +Repertoire supports HTML5.

What do you need?

- A TYPO3 installation with an entire Organiser (org) installation.

Audience

- TYPO3 integrators
- Professional TYPO3 developers, TYPO3 agencies
- Actors, producers, organisers, theatres

Quick Installation

1. Install Org +Repertoire and configure some options in the Extension Manager.

2. Add and configure a sysfolder in the page tree.

3. Complement your TypoScript configuration.

4. Add a page in the page tree and insert the needed plugin "browser".

5. Insert your workshop data.

Installation

There is another extension Org +Workshops, which is similar to Org +Repertoire.

Please refer to that manual. See:

- http://typo3.org/extensions/repository/view/org_workshops/current/

Thank you for your understanding, that we can save a lot of work.

Update from < 3.x

Maintain the plugins / flexforms

Org +Repertoire needs from version 3.0 any own HTML template. See "Any own HTML any longer" on page 11 below.

Because of this new feature, you have to need update each plugin with an Organiser template.

Illustration 9: Invalid template value after the update   Illustration 10: Please select the template "Default" or "Margin"

The Organiser has the two templates:

- Default
- Margin

Default is the template for rich content: the plugin is placed in the content area of your website usually.

Margin is the template for reduced content: the plugin is placed in the marginal columns of your website usually.

TYPO3 < 4.7: Include the 4.6 template

If you are run TYPO3 with a version smaller than 4.7, you have to include the static template

- +Org-Repertoire: Basis for TYPO3 < 4.7 (obligate!)

Please include it below (after) all other Organiser templates!

What's new?

Version 3.0

HTML5 support

[3.0.0]

Org +Repertoire supports HTML5 from TYPO3 4.7 in principle.

Any own HTML any longer

[3.0.0]

Org +Repertoire from version 3.0 doesn't need any longer an own HTML template. It is using the Organiser HTML templates.

This a big advantage, if you have a need to change anything in the HTML code.

Because of this new feature, unfortunately you have to update each plugin / flexform, which is using Org +Repertoire.

jQuery theme support

[3.0.0]

All HTML templates and all TypoScript templates are improved for jQuery themes. You can select one of 23 themes with the plugin / flexform of the TYPO3 browser.

Helpful suggestions and benefits

Forum

If you have helpful suggestions, feel free to publish any question or code snippet on

- TYPO3 Organiser forum at
  http://typo3-browser-forum.de/

Posts are welcome in English and German.

TYPO3 Forge

Bugs and Feature requests can be posted on TYPO3 Forge too:

- http://forge.typo3.org/projects/show/extension-org_repertoire

We would be very happy.

Further Information

Other extensions published by Die Netzmacher

- autositemap: A smart site-map optimised for the footer. It groups menus in columns. Great menus will get two columns. Configuration is based on TypoScript HMENU.
http://typo3.org/extensions/repository/view/autositemap

- Browser – TYPO3 without PHP. Develop your TYPO3 extension 8 times faster! You need 1 line TypoScript for a result list with a search form, a record browser and an index browser. Images are wrapped self-acting. SEO, Search Engine Optimization, is integrated. http://typo3.org/extensions/repository/view/browser/current/

- Green Cars (Grüne Autos) - Database optimized for ecological cars. It is a case study and demonstrates, how to get a complex database with the browser (see above) in three hours only.
http://typo3.org/extensions/repository/view/green_cars/current/

- Jobmarket is a catalogue with job offers. Views, the a-z-browser, the page-browser, the search, social bookmarks and a lot of other stuff can configured by the Browser plugin with the mouse. Job Market hasn't any PHP code, it should be easy to adapt it to your needs.
http://typo3.org/extensions/repository/view/job_market/current/

- Majordomo: For subcribing to and unsubscribing from a majordomo mailing list.
http://typo3.org/extensions/repository/view/majordomo/current/

- Organiser provides a lot of features for handle news, events, staff, headquarters, locations, repertoire, workshops and a calendar. Sell your online tickets! Available from April of 2011
http://typo3-organiser.de/

- Quick Shop (extkey: quick_shop): The fastest shop in the history of TYPO3. Install it with one mouse click only! Quick Shop is based on the browser (see above) and powermail.
http://typo3.org/extensions/repository/view/quick_shop/current/

- PDF Controller: Easy to install. Add to your HTML page the PDF-controller-button. Link from the button to the controller. Adjust the controller by mouseclicks. The PDF Controller supports CSS 3.
http://typo3-pdfcontroller.de/

- seo_dynamic_tag: Search Engine Optimisation. You can generate values dynamically with this extension especially for the <title>-tag, for the <meta>-tag description and the <meta>-tag keywords.
http://typo3.org/extensions/repository/view/seo_dynamic_tag/current/

- TSconfig Pages and Users by extManager (extkey: tsconf): Configure the the eight most commonly used TSconfig porperties with the mouse - like page tree uids, activated extended view, activated clipboard, ...
http://typo3.org/extensions/repository/view/tsconf/current/

- tt_news select configuration (extkey: ttnews_selectconf) enables to select tt_news by any SQL clause. The extension adds an andWhere clause to the SQL query of the tt_news plugin. I. e. it is possible to display tt_news items in dependence on the ownership of a fe_user.
http://typo3.org/extensions/repository/view/ttnews_selectconf/current/

- Wine Catalogue provides a data base for wine with regions, wineries, styles, variety and ageing among others. It is localized. English, German and Spanish ist of the box. Wine based on the extension browser (see above).
http://typo3.org/extensions/repository/view/wine/current/
